"Where Quality and Price Meet"

Local Firms Erect New Premises and Additions

Town Enters Into Construction of Sidewalks

One has to go back many, many years to find a period to compare with the present for business development. One might almost liken it to a boom. The prosperity of the country surrounding has undoubtedly much to do with this state of affairs, and coupled with this is the bright and glowing future promised in greater cultivation, opening up of

new territory, and last, but by no means least, the optimism of the residents. This combination of conditions and circumstances has brought out a new feeling, and the tale we here unfold is the result.

As perhaps is natural in this mechanical and motor-driven age, the local garages are fully alive to the opportunities presented by "the open road," and the surfacing of the main highway has emphasized the fact.

Adshead's Garage, for instance, is showing development on a large scale. Recently, at considerable expense, this enterprising firm drilled deep in

Presentations To Departing Citizens

A delightful evening was spent at the large and commodious residence of Mr. and Mrs. J. H. Lowrie on Friday evening last, when members of the Eastern Star, together with a number of friends, gathered there as a farewell party to bid good-bye to Mr. and Mrs. W. Derby, who were leaving Didsbury to take up their residence at Medicine Hat. Mrs. Derby had for several years been an active and zealous member of the above Order, for sometime filling the important position of secretary, the duties in connection with which she performed to the satisfaction of all, and her departure especially is keenly regretted. The evening in question was opened with a whist drive, in which some forty of the guests participated, the prize for the ladies being won by Mrs. Geo. Burns, whilst Cecil Studer was the fortunate gentleman. Immediately following cards the ladies served a delicious and appetizing lunch, and a delightful brewing of tea having been served and duly appreciated.

Mrs. W. Leadbetter, in an excellent address, presented Mrs. Derby, in behalf of St. Hilda Chapter, O.E.S., with a lovely gold ring bearing the emblem of the Order. Mrs. Derby responded in a few appropriate words, in which she was ably supported by her husband, Mr. Derby extending a hearty invitation to those present to visit them in their new home.

The generosity and goodwill of the member of St. Hilda Chapter was further exemplified in their presentation of a handsome edition of Pauline Johnson's works to W. P. Cotton, who is also leaving shortly. This presentation was accompanied by a few words by W. Leadbetter, the recipient duly responding.

Obituary

After a long and painful illness, Mr. Andrew Bolander passed away at Didsbury in the early morning morning hour of May 29, 1928, at the age of 80 years, 6 months and 19 days.

He was born Nov. 9, 1847 in Waterloo County, Ontario, where he resided until 1899. He then came to Alberta and homesteaded several miles west of Carstairs in the Waterloo District, where he resided 21 years. In 1920 he moved to Didsbury, living here until the time of his death.

He leaves to mourn a sorrowing widow, 6 sons and 3 daughters: John H., Conrad S. and Mrs. E. Schwindt of Elmira, Ont.; Mrs. John S. Wittig of Melfort, Sask.; William, Henry, Addison and Oliver of Bearberry, Alta.; also one brother Henry and one sister Mrs. L. Miller of Elmira, Ont.

The funeral service was held on Thursday, May 31, in the Didsbury Evangelical Church, Rev. H. E. Roppel officiating. The cortege then proceeded to West Zion Mennonite Church, where the service was continued and interment took place. Rev. H. J. Harder and Rev. C. Hollman officiated at this place.

DIED

On Wednesday, May 30th, 1928, at the residence of F. H. Budgeon, Didsbury, Veronica Weber, aged eighty-one years, eleven months and fifteen days.

Conrad C. Swalm, on Monday, May, 28, 1928, at Didsbury. Aged 72 years, 10 months and 19 days.

Talk Peace To Have Peace

It is now fairly well recognized by students of international relations that one of the causes of war is to be found in the constant predictions of war, in references to "the next war," and surmises as to the varying forms which hostilities will take when nations again take up arms against each other. Those who constantly predict war are, says a college president, "not simply reporters of probable events, they are actual causes of war, generally among the chief causes." That is, talk war and you have war.

Recognizing the correctness of this view, it is equally true that if the statesmen and leading men in all countries cultivate the habit of talking peace, instead of war, the world will have peace. "The oftener world peace is discussed among serious minded men and women," says a United States paper, "the better the prospect that war can be at last conquered," and it adds that the more intelligent leaders of democracy the world over can be brought together to consider steps for peace. As they gather from time to time at Geneva the brighter becomes the prospect that ultimately—perhaps sooner than most of us now believe—war will be abolished.

War after all is largely a state of mind. Let the people of any community or country begin to take a pessimistic view of things and constantly harp upon business depression and hard times, and it is inevitable that depression and hard times will come. Equally true is it that when people talk prosperity and adopt an optimistic tone, a revival in business and industrial activity follows. If, instead of thinking of "the next war" and talking war, people think and talk peace, then peace rather than war will prevail.

It has been reported that the Supreme Court of the United States has settled one hundred disputes between States, and in Canada our Supreme Court and the Judicial Committee of the Privy Council, have settled numerous disputes between Provinces and between Provinces and Dominion. Why should not disputes between nations be settled in a like sensible way? There is quite as much justification for two States or two Provinces to declare war and fly at each other's throats as there is for two nations to take such insane action.

War is a stupid business. It settles no issues. It comes about when a little group of men get into a quarrel with another little group. The law does not allow individuals to murder each other because they have a quarrel, and international law should, in like manner, outlaw war as a means of settling disputes between nations. War between nations is evidence that the leaders in these countries have not sufficient intelligence or sufficient patience to find a way out, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this the longer is the wiser and gets its own way. There is no reason employed in the settlement.

Sir Esme Howard, British Ambassador at Washington, in a recent address said: "If it can be proved to a man that if his country goes to war for any issue short of its absolute liberty of action at home, and in defence of that liberty, he will in future stand a very good chance of being bombed in his home; if we can show him that even though his country may be victorious, he will certainly have his taxes increased by 200, 300, 400 or 500 per cent.; if we can make it clear to him that for the sake of some issue to which he is probably an entire stranger he risks having to give up that new Ford next month, or, even worse, that he may very probably be thrown out of work, as has been the fate of millions in Europe after the last war; then perhaps he may find war less pleasingly dramatic and may bestir himself to see that as a means of settling disputes between nations, it is better abandoned. So far as statecraft is concerned, the fear of war is the beginning of wisdom."

Some people may be inclined to doubt the value of Peace Talks, Disarmament Conferences, and treaties between nations outlawing war, but the fact is these are all factors in educating people and helping to create and develop a peace consciousness in all countries. And, let it be repeated and emphasized, the creation of such a consciousness is the strongest of all guarantees for the maintenance of peace.

Medical Aid Caravan

A medical aid caravan will circulate through Northern Alberta this year. It has been sent out by the provincial department of health and is in charge of Dr. R. T. Washburn, superintendent of the University of Alberta hospital.

The beam cast by the latest monster beacon is estimated at 500,000,000 candlepower.

Increase In Acreage

Increase in acreage of every grain in the Lethbridge Railway division with an increase of over half in rye is shown by the first crop report of the Canadian Pacific Railway.

A British scientist predicts that, in time to come, men will be born toothless. We thought, in our ignorant way, that they usually were born that way.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Parachute Lands Plane Safely

Invention Of California Man Proves Feasible In Test

A small biplane has been landed safely from 2,000 feet by means of a huge parachute, without injury to its pilot or damage to the plane. The experiment, performed privately at Tracy, Cal., was designed to prove the possibility of using a parachute for disabled planes to insure safety of passengers. A Jenny biplane, piloted by E. J. McKeown, was used in the test.

The plane dropped about 2,000 feet with its motor idle, when the huge parachute, more than 100 feet in diameter, opened out. McKeown stayed with the ship as its speed rapidly slackened. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged except for a minor bend in the tail skid.

The parachute is the invention of Charles Roderick, San Francisco, who with numerous other airmen, expressed complete satisfaction over the result of the experiment.

Tractors On the Farm

Western Farmers Investing More Heavily In Motors For Heavy Duty

There are in Alberta today 77,192 farmers who have 834,324 horses in use, and 10,225 tractors. In Saskatchewan records show 116,762 farmers with 1,199,566 horses, and 24,367 tractors. Manitoba has 51,200 farmers with 356,480 horses, and 10,833 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers, or will be sent to any address, post paid, at 25 cents a box by addressing The Dr. Williams' Medicine Co., Brockville, Ont.

Tribute To British Flag

Union Jack Made Union Flag Possible Says South African Councillor

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some commotion about it—South Africa. A press despatch from there says that native affection for this flag was eloquently demonstrated at a General Council of the Transkeian Territories which might be described as a native Parliament, when the Council unanimously passed a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magistrates' offices in the native territories. A Councillor asked the members not to discard their old friend the Union Jack, which had freed them from slavery and which was the only flag they knew. He did not object to the Union Flag, but pointed out that were it not for the Union Jack there would be no Union flag. We might also venture to say that were it not for the Union Jack there would be no Canada as there is today.

Progress Has Been Made

Sending Messages By Beam System Is Marvel Of Speed

What beam wireless has done for long-distance communication was explained by J. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal branch of the Engineering Institute of Canada, recently. Using slides, the speaker produced a graphic picture showing a telegraph operator at Drummondville, Quebec, using an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the minute, to be received almost instantly by an operator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless the progress having been so rapid that equipment of stations used 15 years ago is of no use today. The beam system itself, he said, was the result of experiments by which all the energy available at the sending station was successfully sent in one direction thus establishing a beam of energy.

Some men are sentenced to hard labor for life and some do it of their own accord in order to make ends meet.

Seed Growing In B.C.

Industry On Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island of steadily increasing importance. Vancouver Island sweet pea seed sells on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed farm is at Duncan, which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed whose excellence and high quality is becoming world-famous.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

A man could learn a great many things if he didn't think that he already knew them.

For Hay Fever—use Minard's.

The average man prides himself on the possession his neighbors can't afford.

HERCULES

PERMANENT BUILDING PAPER

EASY TO USE

Hercules Permanent Building Paper is tough. It will not tear or crack with rough handling. Builders save time and avoid inconvenience with it.

EASY TO SPECIFY

Hercules comes in three grades—x, xx, xxx—for various purposes. Specify "Hercules" and the grade required.

EASY TO SELL

When a home is Hercules protected, selling is easy. There is always a ready market for a dry and warm home. Hercules is tested and proven wind proof and damp proof.

Examine Hercules. We will gladly furnish samples. May we?

Appleford Paper Products

HAMILTON, CANADA

POOR SALARIES PAID SCIENTIFIC AGRICULTURISTS

Ottawa.—A motion to go into supply in the House of Commons prompted C. G. Coote U.F.A., Macleod, to protest that salaries paid to men in the scientific and technical positions of the department of agriculture were inadequate.

Mr. Coote declared that the department of agriculture was losing the professional men because of the low salaries which were paid. He gave a comparison between salaries paid in the United States service and in the Canadian to illustrate the fact that Canada paid much less than the U.S.

The professional service of Canada said Mr. Coote, must compete with that of the U.S. for men. As things now stood many Canadians went to the U.S. to take post-graduate university courses. Frequently they remained there because of the fact they could obtain more money in that country.

Mr. Coote compared salaries paid in the cereal division of agriculture with those paid in the geological survey. The figures he quoted showed that the salaries in the cereal division were lower. Canada could not afford to lose her scientific agricultural men, he declared. Agriculture was Canada's basic industry and wheat growing was the most important phase of that industry.

J. S. Steedman, Liberal-Progressive, Souris, declared the question of the salaries paid to scientific agricultural men was one of the most important matters which had come before the house this session. It should be realized that the prosperity of Canada depended largely on her agriculture, yet the ravages of disease were spreading in certain quarters of agricultural Canada, and it was of prime importance to the Dominion as a whole that adequate salaries be paid our scientific agricultural officials so that their research efforts could be used for the benefit of agriculture in this country.

Inspection Satisfactory

Objection To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto. — "We have examined every single objection that has been raised against the examination overseas by Canadian doctors of assisted passage immigrants and we have not found one that will hold water," declared Dr. David Clark, assistant Deputy Minister of the Department of Natural Health, in an interview here.

Articles appearing in certain sections of the British press against the policy of having Canadian doctors conduct examination of immigrants were full of inaccuracies, he said.

"The causes of a decrease in immigration to Canada this year," continued Mr. Clark, "lie deeper than the medical inspection policy. One of the causes for the decrease of immigration from Britain, he felt, was the feeling of increasing optimism there

A Martyr To Science

Noted Doctor Is Latest Victim Of Scientific Research

London.—News was received here of the death of Dr. William Alexander Young, director of the Gold Coast Colony, Africa. Dr. Young was a co-worker with Dr. Hideyo Noguchi, who died recently at Acera, of yellow fever, resulting from his researches into the origin of that disease.

It is believed here that Dr. Young contracted the disease in the course of his researches with Noguchi.

Young was of Scotch descent and had a long experience with tropical diseases. In 1924 at the comparatively early age of 35 he was appointed to his present position.

Tornado Near Kansas City

Kansas City, Mo. — A tornado struck Englewood, a suburb between here and Independence, Mo. Two street cars were reported wrecked. Ambulances were sent to the scene.

Record During March For Canadian Roads

Railways Carry More Freight Than In Any Previous March

Ottawa.—The Canadian railways carried more freight during March, 1928, than in any previous March. Gross revenues also were the largest earned in March, exceeding those of March, last year, by \$2,135,479, or 53 per cent. Although operating expenses were heavier than in 1927 by \$1,252,220, or 3.9 per cent, net revenues were larger by \$883,259. The large carry-over of grain has been an important factor in the heavy traffic and earnings of the railways during the first quarter of 1928, the movement of grain to the Pacific ports being particularly heavy. The March payroll was heavier than in 1927 by \$1,037,133, and the average number of employees increased by 3,022.

The Canadian National Railways increase in gross revenue, compared with March, 1927, was \$756,717, or 4.5 per cent, for an increase in freight of four per cent, and a decrease in passenger traffic of 6.3 per cent.

The Canadian Pacific Railway gross returns for March were heavier than 1927 by \$1,351,348, or 8.8 per cent. Passenger and express revenues showed decreases but all other accounts were larger, freight by 12.5 per cent.

Operate On Cost Basis

Alberta Wheat Pool Elevators Adopt New Policy

Calgary.—Wheat Pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by a full attendance of Pool delegates in convention here.

The new policy laid down will represent something new in co-operative effort in Canada, if not in the world. It means that the members will be charged only the bare cost of operating the elevator facilities.

When they haul their grain into Pool houses no service or elevator charges will be made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final Wheat Pool payment.

This change in elevator policy was recommended to the delegates by the directors. The proposal was to eliminate handling and service charges upon delivery of the grain to the Pool elevator and deduct the actual operating cost on a per-bushel basis from the final Wheat Pool payment.

Has a New Mission

Premier King Requested To Arrange For Necessary Rainfall To Ensure Good Crops

Ottawa.—Premier King has a new mission. The latest request is that he shall appoint himself rain-maker extraordinary to Saskatchewan.

"We have had a wonderful seeding time and everything is now in the ground in good shape," runs a letter from Saskatchewan, which Senator Laird read in the Senate recently. "I wish you would draw the attention of the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to deliver the greatest crop Western Canada has ever produced."

Vote Sum For League

Ottawa.—The House passed a vote of \$155,968 for Canada's contribution to the League of Nations. Hon. Hugh Guthrie brought up the question of German currency held by the Canadians, which had been repudiated by the German Government. The Prime Minister pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

Inquiry Is Ordered

Ottawa.—The parliamentary immigration inquiry has approved a motion for a return showing all special immigration permits issued from January 1, 1920. The report will show the number of permits, officially termed letters of admission or assurance granted to members of parliament and others.

Germany has a shortage of skilled labor.

May Receive Appointment

The possibility that a Canadian judge will take the place on the permanent court of international justice of The Hague left vacant by the resignation of John Bassett Moore, of the United States, is now openly acknowledged in well-informed circles at Washington. Already, it appears, the name of Mr. Justice Riddell, of Toronto (above), as well-known almost in the United States as in Canada, is mentioned as a likely successor to the American jurist.

Bill Defeated In Senate

Government Measure To Amend Naturalization Act Thrown Out In Upper House

Ottawa.—The Government bill to amend the naturalization act was killed in the Senate.

The bill would have placed authority for the granting of naturalization certificates in the hands of the secretary of state without its being necessary for the applicant to make prior application to courts, as now required.

The bill met stormy opposition in the Commons.

It was discussed at some length by the Senate recently in committee of the whole. Eventually Senator Laird moved that the committee rise. This was carried by 38 to 20. The effect was to kill the bill.

Senator Dandurand, Government leader, explained the measure, which he said would simplify procedure and prevent abuses. The state department had a well-trained staff to handle the work. Experience had shown that court inquiries on naturalization were absolutely useless.

Inmates Of Canadian Prisons

Ottawa. — Canadian penitentiaries have at present a total of 2,580 inmates. Of this number, 2,539 are men, and 41 are women. Canadian born number 1,614, and in all 48 nations are represented. This information was given in the Senate in reply to a question by Senator J. P. B. Casgrain.

Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. Bi-weekly in each direction between Toronto, Ottawa, Montreal and Rimouski, where the steamers are met, the new service cuts two days off the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

U.S. Honors War Dead

Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington. — The White Crossed rolling hills of Arlington beckoned thousands of citizens, soldiers and sailors of the national capital for the annual memorial service, May 30, at the graves of the fallen heroes of all wars.

For the first time since he entered the White House, President Coolidge led the nation in memorial day exercises outside of Washington. His annual tribute was paid in an address near the spot where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington.

Sir Esme Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the exercises in Arlington cemetery, where they decorated the graves and the Cross of Sacrifice erected by the Canadian Government in memory of Americans who died while serving as members of the Canadian corps.

Ontario Joins Manitoba

In Legal Fight With Federal Government Over Regulation Of Securities

Toronto.—Announcement has been made by Hon. W. H. Price, Attorney-General for Ontario, that the province is joining with the province of Manitoba in the latter's legal fight with the Dominion Government over the question of certain rights in connection with the regulation of securities.

Edwin Bayly, K.C., Deputy Attorney-General, will leave for England June 15, and will appear with Hon. W. R. Craig, K.C., counsel for Manitoba, when the case is heard by the Privy Council early in July.

Receive Degrees At McGill

Honorary Degree Conferred On Five Distinguished Candidates

Montreal.—The honorary degree of Doctor of Laws was conferred on five distinguished candidates at the 1928 convocation of McGill University.

The recipients were: Sir Wilfred Grenfell, famous Labrador missionary; Rev. Canon Cody, Toronto; William Reid Blair, director of the New York Zoological Park and a graduate of McGill; George Isles, writer, and Julian C. Smith, financier.

Sir Arthur Currie, principal, had not sufficiently recovered from his recent illness to be present.

Appoint Conciliation Board

Ottawa.—A conciliation board has been appointed to investigate the carpenters' strike in Calgary. Mr. Justice Clarke will be chairman. James H. Gordon will represent the employers, Robert Hewitt, the men. The men are asking for an increase of 12½ cents an hour.

COOLIDGE MAKES STRONG PLEA FOR WORLD PEACE

Gettysburg, Pa.—In the first speech to be delivered by a president on the Gettysburg battle field since Lincoln's immortal address, President Coolidge, in connection with the Memorial Day exercises, voiced a plea for the abolishment of war as the fittest tribute to the war dead of America.

At the same time he demanded less indifference to crime in the U.S. and condemned what was described as a tendency of the legislatures to exceed the powers granted to them by the constitution. These things, he said, tended to weaken the regime of law and breed turbulent populations, prone to war.

Declaring the "one thing we want above all else for ourselves and for other nations is a continuance of peace," Mr. Coolidge reviewed negotiations by the state department for treaties against war and for arbitration treaties.

The Briand proposal that the United States and France sign a treaty to renounce war was described by the President as having developed into "one of the most impressive peace movements that the world has ever seen."

"It is my earnest hope that success may crown the negotiations now in progress and that the ideals which have inspired the French minister of foreign affairs and the secretary of state of the U.S. in their joint efforts to find a solution of the problem of peace, may find a solution of the problem of peace."

Would Provide Work For Ex-Service Men

Resolution Favors This As Best Memorial To Earl Haig

London.—The ex-service men at the British Legion conference passed a resolution to the effect that the best tribute that could be paid to Earl Haig would be providing work instead of relief for ex-service men.

Lady Haig was present and said this would have met with the approval of her husband, whose desire would have been, not a statue of himself, but that the men who had fought in the war should be helped.

It is understood that the resolution and Lady Haig's remarks were not intended to deprecate the idea of a national memorial to the late Field Marshal, which the Government is now considering.

British ex-service men will attend the conference of ex-service men, including former enemies, to be held at Luxembourg next September.

Replace Provincial Police

R.C.M.P. Have Taken Over Work Of Saskatchewan Force

Saskatoon, Sask.—The Saskatchewan Provincial police force passes into the pages of history of the northwest, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan sub-division being under the direction of Inspector John Kelly, who transfers from the disbanded force to the "scarlet riders." Some other members of the S.P.P. will join the R.C.M.P., while the following members of the latter force, located at the Saskatoon detachment for some time, will carry on: Sergt. A. Drysdale, Detective Sergt. C. E. Hildyard, and Constables T. Theriault and F. W. English. The first two have a long service record in the force, dating back to the old Northwest Mounted days.

Against Fast Time

Vancouver. — Vancouver residents will continue for the remainder of this year to work and play on standard time. By a vote of more than four to one the citizens today voted against adoption of daylight saving time for the summer months.

Complain About Expenses

Ottawa.—Complaints of Canada House were heard in the House when a vote of \$70,000 for contingencies and \$39,000 for salaries for the high commissioner's office in London were under discussion. After considerable debate, the item carried.

King Hiram Lodge No. 1 A.F. & A.M.
Meets every Tuesday evening on or before full moon. All visiting brethren welcome.

J. MacDougall, W.M.
H. Morgan, Secretary

The continuous tinny noises issuing from our neighbors' premises (Clemens & Kaufman) indicates a rushing business.

"DIDSBURY PIONEER" NOW UNDER NEW MANAGEMENT

Having purchased the plant and property of the Didsbury Pioneer it now becomes my duty as well as one of extreme pleasure to introduce to the Pioneer's many readers the two young men who now have full control and management of the plant, whom you will find ever ready and willing, as residents of Didsbury, to co-operate with any good movement that will be a benefit to town and surrounding district.

Mr. Edwin Gooder, who has leased the plant, will be found at his desk as editor and manager, and has been fortunate in securing the services of Mr. Ernie C. Fletcher, formerly of Vernon, B.C., who has charge of the printing department.

I invite you to co-operate with the new management of your town and district newspaper, and do not exaggerate when I state that a good live newspaper is essential to the prosperity of Didsbury and surrounding district.

The new management will always aim to publish a clean, live weekly

newspaper and endeavor to do their bit in the upbuilding and development of the community by being real boosters. Use the "Tug-o'-War" method—pull strong together for a prosperous Didsbury.

W. C. GOODER.

LOCAL & GENERAL

Mr. Russell Cline of Vulcan spent the week end with his parents.

Mr. and Mrs. C. Studer returned home last week from a very pleasant and motor trip to the Coast.

Mr. Ward Wyman returned from Killarney, Man., last week. We hope to see Ward in a Didsbury baseball uniform next Friday.

Besides giving pleasure to our golfers, a herd of cattle are waxing fat at the course in an attempt to prevent the "prairie wool" from growing knee high.

Mr. Len Cotton left last Wednesday evening for Salmon Arm, B.C., where he has accepted a position on the staff of the Salmon Arm "Observer."

Lon Chaney in "Big City" at the Opera House, Wednesday June 13th

Snell & Carter, Sight Specialists of Red Deer, have opened a permanent office in the Royal Bank Building and will visit Didsbury again on Monday, June 18th.

The Women's Guild of St. Cyprian's Church will hold their summer sale in the Opera House on Saturday, June 9th. Tea will be served from 3 to 6 p.m. Any donations will be gratefully received.

The Red Tux Orchestra held their opening dance of the season in Graham's Hall, Sylvan Lake on Friday, June 1st. The orchestra played on May 24th to the largest dance ever held at Waterton Lakes.

At the last meeting of the I.O.D.E. it was decided to hold a garden party the latter part of June. Watch for further particulars.

We notice that Stuart Tighe is driving around town in a new Ford purchased from Roger Barrett.

Mr. and Mrs. Geo. Burns returned last week from a motor tour during which they covered about a thousand miles. They drove over a large part of Southern Alberta and, as far as conditions permitted, a considerable distance along the Banff-Windermere highway.

Rin Tin Tin in "Jaws of Steel" on Saturday, June 9th at the Opera House, Didsbury.

Geo. Dippel suffered a serious loss by fire last week, when his barn was struck by lightning and completely destroyed. A number of men went out from town to assist, but at the time of their arrival the structure was ablaze from end to end. The barn measured 32x40, and contained at the time of the fire six sets of harness and a saddle, all of which were destroyed.

The W.C.T.U. will meet at the home of Mrs. Oldham on Thursday the 14th at 3 o'clock. Cars will leave the Evangelical Church at 2:30. The topic will be Christian citizenship. Interesting items of the convention will be given, a full report later. All members are requested to attend this meeting.

The John Deere Co. is selling its Combine with Swather and Pickup in Alberta. The Swather and Pickup promises to revolutionize harvesting expense and at the same time will lessen the worry of the farmer. A few of the farmers east of town, with a large acreage, have already ordered these machines.—Roger Barrett.—Adv't.

Until we get acquainted with the Didsbury and district's big family, we would esteem it a great favor on the part of our readers if they would phone in news items of interest.

Do not let your visitors return home without doing them the honor of recognizing their visit in our local columns. It is an act of courtesy that is really appreciated. Our telephone number is 12.

The many Didsbury friends of Alex. Hendry, Jr. will be pleased to hear he has been successful in passing his first year at the University of B.C. at Vancouver with good standing.

Because it is Farmer Owned

Because it is farmer owned, farmers expect, and they have a right to expect, the highest possible standard of service and treatment at elevators of this farmers' company.

And many farmers do tell us that they do get such service and treatment at U.G.G. Elevators.

FIVE REASONS

WHY WHEAT PRODUCERS SHOULD SUPPORT

THE WHEAT POOL

~~~~~

1. Because your self-protection as a producer is incomplete and ineffective if private organizations can still exploit you by manipulating prices against you.
2. Because co-operation helps to uphold the standard of living by suppressing the element of profiteering in the grain produced by your labor.
3. Because co-operation eliminates unnecessary middlemen and dividend hunting shareholders, who take a heavy toll of the wealth produced by the farm workers.
4. Because the co-operative principal of "each for all, all for each" is the workers' ideal which alone can bring economic and social justice, peace and prosperity, to all throughout the world.
5. Because the farm workers ought to concentrate their resources in co-operation instead of supporting capitalistic organizations hostile to co-operative movements.

Among other improvements effected recently in town may be cited the efforts made by the members of St. Cyprian's church, who have improved the grounds adjoining the church considerably by the erection of a wire fence surrounding the entire property. They have also planted a large number of trees, which will beautify the property and street together.

Just southwest of the church another improvement worthy of note is a cement sidewalk now being laid by J. V. Berscht on the east and west sides of his property. This pavement altogether will have a length of about 220 feet, and it is being built on a fifty-fifty basis, the town and owner sharing the responsibility. This is in accordance with a decision arrived at some time ago by the Town Council, and is, of course, open to any ratepayer.

Attention may also be drawn to Mr. A. G. Studer's fine residence, where a great deal of work is being done to fit the surroundings for the beautiful house built by him.

Upon the same street H. W. Reiber has just beautified and improved his property by laying down a pavement of cement surrounding his dwelling house, and Mrs. Mueller, one notices, has done likewise.

The Town Council, too, is endeavoring to do its part, so far as finances permit. In addition to road construction noted in a recent edition sidewalks are now being repaired, and where necessary new ones laid down. Within the past week or two the whole length extending from Adshad's Garage to the United church has been renewed, and a further considerable extension is that from Burrell's livery barn to the auto camp.

Other instances could easily be given of the real progress now being made here in Didsbury, notably of the decision of the United church to erect a much larger and more imposing structure. Enough, however, has been given in this article to convince the non-residents that Didsbury is fully alive to its future and that business men and private residents alike are imbued with that spirit of progress and optimism which is so characteristic of the west.

INNISFAIR 11—DIDSBURY 8

After playing a tie game with the Northern League ball team in a game played at Innisfail last week, Didsbury came out second best in the return game played on the local diamond on Thursday evening last. A prevailing chilly atmosphere prevented the usual attendance of supporters, but those present were treated to a few merry-go-rounds, that added spice to the contest.

Up to the seventh, Innisfail retained a comfortable lead, but at the end, the hopes for victory by the home team and fans were revived as the home boys indulged in a batting fray and were only one run behind. Innisfail, however, tallied two additional runs which gave them the victory. The lineup of teams:

Innisfail—Kirkham, deLong, Russell, Taylor, L. McMann, Foster, E. McMann, Bond, Battery: E. McMann, Kirkham, deLong and Taylor.

Didsbury—Evans, Clemens, Cook, Marks, Keith, Studer, Liesemer, Berscht, Devolin, Reiber. Battery: Devolin, Liesemer and Clemens.

Next home game is Friday, June 8th, when Bowden will be the visiting team.

CARD OF THANKS

The undersigned desires to express his sincere thanks to all those who assisted at the fire which destroyed his barn a couple of weeks ago, and to assure them their efforts were much appreciated.

GEO. DIPPEL

Mountain View Notes

Mr. and Mrs. P. R. Reed and family of Calgary and Mr. and Mrs. C. L. Bellamy of Didsbury spent Sunday at Harry Pearson's.

There will be a dance in Mountain View Community Hall on Friday, June 8th. Clemens and Bellamy Orchestra.

A Baby Clinic will be held in the Community Hall on Friday, June 22nd. All mothers in the community are invited to come and bring their babies and children up to six years of age. Free health examination, weighed and measured, between the hours of 10 a. m. and 4 p. m.

Life Insurance Service

"A Corrective of the Trend of the Times"

Ladies and Gentlemen:—Are you heeding the warning to beware the great army of high-pressure salesmen who are importuning the public to "eat, drink and be merry, for tomorrow you die," and are screaming, "Spend, Spend, Spend!" at the top of their strident voices. . . . Will you let me explain to you how, through the medium of Insurance, you can Save and provide for future unexpected contingencies.

My appeal is not to self-indulgence but to self-sacrifice;

Not to extravagance but to prudence;

Not to hysteria but to common sense.

WHAT ARE YOU GOING TO DO ABOUT IT?

You control your own destiny.

NICHOLAS LAMMLE, District Representative

WORLD HAPPENINGS BRIEFLY TOLD

Partial prohibition has been decreed in Tabasco, Mexico, by the State Government. An order was issued making it unlawful to sell any alcoholic drink except beer and cider.

There will be no Canadian cadets sent to the Junior Blisley rifle meet this year, it has been announced. Word has been received that a team would have to pay its own expenses.

Three delegates from Soviet Russia will attend the International Wheat Pool conference to be held in Regina on June 5 to 7 inclusive, according to word received by C. P. Burnell, chairman of the International Conference Committee.

Gerald T. Evans, of Vancouver, B.C., won the Sutherland gold medal in biochemistry, it was announced at McGill University, when the second year results in the Faculty of Medicine were posted.

A matter of fact statement in the official Turkish newspaper Milliet says that the Ankara Government has passed a law forbidding the importation and use of calculating machines in Turkey under severe penalties.

The application of the Winnipeg Board of Trade for a revision of the regulations applying to attendants travelling with race horses has been rejected by the Board of Railway Commissioners. The application was to permit more than two attendants to travel free in cars with race horses.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Build Eighteen Elevators

Eighteen elevators are being constructed by the Alberta Wheat Pool. Each will have a capacity of 30,000 to 40,000 bushels.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Orser, Elginburg, Ont., writes:—"I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would have real bad spells. I suffered in this way for some time when, one day, I saw

advertised, so decided to try them. I had only taken a few boxes when I noticed that I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

W. N. U. 1736

Farmers' Marketing Tour

Canadian National Railways' Tour
To Great Britain and
Denmark, 1928

Continued.

The Co-operative Wholesale Society embraces almost every conceivable form of modern industry and commerce. It manufactures everything that the modern household needs. It owns a fleet of ships, a printing establishment, wharves, warehouses, fishing stations, tea plantations in Ceylon and farms in the British Isles. It operates a bank, which has an annual turnover of several million dollars. Its Sun Flour Mill is the largest in Europe and works day and night. Here great quantities of Canadian wheat are regularly used. This was our next point of inspection. We were all squipped with long white coats and spent two hours seeing this tremendous mill.

Following our visit to the C.W.S., we were the guests of the Chamber of Commerce at a meeting arranged by representatives of the Fruit and Provisions Trades, who addressed us on the requirements of the Manchester market. We were thus again enabled to gather much useful information.

We now hurried back to our hotel and to get ready for one of the outstanding functions it was our privilege to enjoy during our trip—the reception by the Lord Mayor and Lady Mayoress of Manchester. Over 1,200 citizens of Manchester assembled in the Guildhall to meet us and the spectacle as all these people stood in the main body of the brilliantly lighted hall, while we were welcomed by the Lord Mayor, is one that will never be forgotten by those who attended.

On the morning of the 20th we were taken through Trafford Park, one of the greatest and most modern industrial sights of England. Here there were vast storage and handling facilities for products from every quarter of the globe that find their way to Manchester. Some Canadian products were on view, but competing products from Ireland, Denmark and other countries were much more in evidence. We saw the great safes where cotton is stored and after which the latest cotton storage safes of New Orleans have been modelled.

We were here privileged also to see one of the greatest industrial plants of England—the Metropolitan-Vickers Electrical Works—the magnitude of which could not be comprehended by one who has not seen it. Here is made everything electrical from the equipment of super-power stations to the smallest domestic appliances. In the main shops each of the great aisles is 900 feet long by 90 feet wide, the over-all width of each shop being 440 feet, and 80 feet from the floor to the ridge of the roof. Each of the two main aisles is spanned by three or four fifty-ton electric cranes, which can pick anything up from any part of the floor.

We were next taken for a trip down the great Manchester Canal, by which ocean-going steamers reach the very doors of the city, 35 miles inland. Accompanied by the Chairman of the Board and many other officials we were enabled to view the great shipping of the port and pass through lock after lock toward the sea. During this trip we saw a swing bridge over the Canal open to let our steamer pass and when it closed we saw, to our astonishment, that the swing bridge itself was part of a small canal on a higher level and a few seconds afterwards a number of barges passed over it.

The Manchester Ship Canal might be said to be one of the wonders of the world. Though a private company, it is owned by 40,000 shareholders, many of them laboring men. The rise of Manchester to its present position as a port, is almost entirely due to the completing of the Ship Canal. The long hard parliamentary fight for its construction developed in Manchester a co-operative spirit and civic pride which would be hard to duplicate in even a modern Western Canadian town.

After viewing the Ship Canal we were the guests of the company to a magnificent lunch in the Midland

Hotel, to which were gathered the leading business men of Manchester.

Following this we paid a short visit to the Royal Exchange, the largest Exchange in the world, with a ground-floor space of one and three-quarter acres. Unlike trading exchanges in our country, seats are not owned, but members join on an annual fee basis. The Royal Exchange of Manchester represents chiefly the cotton industry and those allied to it. "High change" is on Fridays, when as many as 7,000 men may sometimes be seen gathered together buying and selling on the floor of this Exchange.

Our journey from Manchester to Wolverhampton provided a mild adventure, for by the time the coaches had reached Knutsford, a little town made famous by Mrs. Gaskell, in her story "Cranford," a fog blanket had fallen. We "hove to," wondering if we would be able to continue the remaining 80 miles, or if this fog would mean a night in the coaches by the side of the road, with every chance of being rammed from behind by other motorists. After an hour's wait, however, the fog lifted somewhat, and it was decided to push on as long as our drivers could see a yard ahead of them. The headlights were turned to the side of the road and with one man standing on the running board we made progress at about five miles an hour. During this long and tedious journey we sang songs and told stories willing away the time after all quite pleasantly.

We reached Wolverhampton at 11.30 where, notwithstanding the late hour we found the Mayor (Councillor A. E. Wood), waiting for us and a steaming supper which was certainly welcome. In the circumstances, the Mayor cut out all formality, inviting us to join him after supper in the lounge where we were entertained. Here also we met Mr. E. W. Brown, of the London Office of the Canadian National Railways, who, besides his business qualifications, has a first class reputation as a Canadian singer, and kindly gave us of his best. We left Wolverhampton immediately after breakfast for the ham and bacon factory of Messrs. March & Baxter, at Brierley Hill, a small town a short distance out of Birmingham. This plant is one of the finest of its kind in the country and Messrs. March & Baxter are the largest bacon curing firm in Great Britain. The Company believe that to maintain quality in their products, the very finest raw material must be used and to this end conduct educational campaigns amongst the farmers who supply them.

(To Be Continued.)

Praise For Canada

Mrs. Stanley Baldwin Cannot
Imagine Anything Nearer
Paradise

"If England ever gets tired of us, the prime minister and I will probably go to live in Canada, that is if we are not too old, for we were so delighted with the Dominion on our recent visit."

This was the declaration of Mrs. Baldwin, wife of Great Britain's premier, Stanley Baldwin, when addressing the girls at a distribution of prizes at the City of London school.

Mrs. Baldwin urged the girls to go to Canada for, she said, "there is no better place for young married people; and providing girls choose the right kind of men, I cannot imagine anything nearer paradise."

Wise mothers who know the virtues of Mother Graves' Worm Expeller always have it at hand, because it proves its value.

New Assistant: What is in that red bottle?

Old Hand: That's the medicine we give customers when their prescriptions are illegible.

Minard's Liniment for insect bites.

An English paper suggests that it is not so hard to escape from a flapper, "but a widow knows all the de-tours."

SUNDAY SCHOOL LESSON

JUNE 10

THE ARREST AND TRIAL

Golden Text: "He was despised and rejected of men."—Isaiah 53.3.
Lesson: Mark 14.43 to 15-15.
Devotional Reading: Isaiah 53.1-6.

Explanations and Comments

Pilate Questions Jesus, verses 1-5.
—It was about six o'clock in the morning when the chief priests and the elders and scribes, the whole council or Sanhedrin, after holding a meeting, declaring Jesus worthy of death and binding Him, hurried Him to the Praetorium where Pilate held his court. Pilate was obliged to come out to them, for the priests would not pollute themselves by entering a Gentile court just before the Passover (John 18, 28, 29). They demanded that Pilate confirm their sentence of death pronounced upon Jesus. Pilate demanded to know what charge they brought against Him. Three accusations they put forward: Pilate was concerned about one of them only. "Art Thou the King of the Jews?" Pilate questioned. The Sanhedrin made this accusation against Him because they needed a political charge, one hostile to Roman supremacy, in order to influence Pilate. Perhaps there was something of contempt and something of pity in Pilate's voice as he looked at the wearied Prisoner and thought Him a pathetic picture of royalty. Pilate had the right to know the truth, and Jesus answered "Yes," as the literal translation of the Greek for "Thou sayest," means. (The Expositor's Greek Testament thinks one is hardly prepared for such a reply to an equivocal question, and says there is a temptation to seek escape by taking the words interrogatively—Dost Thou say so?—or evasively—You say so, I make no statement.)

When the chief priests accused Jesus of many other things, he was silent. "Answerest Thou nothing?" said Pilate; "Behold how many things they accuse Thee of." Still Jesus stood in regal silence, and Pilate marvelled. Jesus knew that no words would influence that mob in their frame of mind. "I read very little in the life of Jesus respecting His rights," F. W. Robertson writes, "but I hear a vast deal respecting His wrongs—wrongs born with an anajestic, God-like silence."

"I have had to learn to keep absolutely quiet under every accusation."—Lincoln.

Recipes For This Week

(By Betty Barclay)

LIGHT LUNCH CROQUETTES

Two cups left-over meat or fish may be mixed with 1 cup thick cream sauce for croquettes. Mold in desired shape, roll in dried bread crumbs, then in beaten egg, again in bread crumbs and fry in hot fat. Thick cream sauce calls for 1 cup milk, 1-5 cup flour, 3 tablespoons butter, 1/2 teaspoon salt and a touch of pepper.

RHUBARB PUNCH

1 quart rhubarb.
1 quart water.
1-3 cup orange juice.
4 tablespoons lemon juice.
1 1/2 cups sugar syrup.
Few grains salt.
1 pint mineral water.
Cut rhubarb in small pieces, cook with water until fruit is soft. Strain through double thickness of cheesecloth, add orange juice, lemon juice, sugar syrup and salt. When ready to serve pour over a cake of ice in a punch bowl, add mineral water and allow to get very cold. Makes 8 glasses; 24 punch glasses.

There are times when the almighty dollar will not go as far as a little politeness.

ECZEMA IN RASH ON HANDS Troubled For Three Years. Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much worse in winter so I could hardly put my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves to keep from scratching."
"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used them for three months I was healed."
(Signed) Miss Beatrice Aiken, Highwater, Que.

Use Cuticura Soap, Ointment and Talcum for daily toilet purposes.
Sample Each Free by Mail. Address Canadian Depot: "Stankhouse, Ltd., Montreal." Price, Soap 15c, Ointment 25c and 50c, Talcum 25c.
Cuticura Shaving Stick 25c.

A Strange Luncheon Party

Twenty Guests Entertained Inside
Great Organ At Royal Albert
Hall

A luncheon party of twenty men inside an organ would seem impossible, yet this happened lately in the swell-box of the great organ at the Royal Albert Hall, London, beneath its 13,000 pipes and amid a storm of music.

The guests had come to be shown some of the intricacies of this wonderful instrument, which is soon to have added to it a solo organ with several thousand new pipes. It will then be the largest concert organ in the world.

At this strange luncheon party one of the hosts was Dr. Eaglefield Hull, the organist, who is shortly giving a series of recitals to test every resource of the huge organ.

The Oil For the Athletic.—In rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years, have been using it can testify to its value as a lubricant.

With nearly 2,500 convicts serving terms in Canadian prisons, less than 150 are Negroid, Indian or Mongolian.

How Much Water Should Baby Get? —A Famous Authority's Rule By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

SHIP CHRISTIE'S BISCUITS BY AIR FREIGHT

When Major Fitzmaurice, the Irish member of the "Bremen's" crew arrived at Seven Islands from Greenley Island, he and "Duke" Schiller, pilot of the relief plane, were met by Mr. L. A. Genest, Lower Quebec representative of Christie, Brown & Co., Limited, and Mr. Stewart of the Clarke Trading Company, who tendered them refreshments in the shape of hot coffee and Christie's Biscuits which were, naturally, much appreciated. The above picture shows the aeroplane which carried the first shipment of Christie's Biscuits by Canadian air freight from Toronto to Windsor.

Sick Stomach Teaches Her a Good Lesson

Miss Jeanne Ginsberg, Bronx, N. Y., writes: "I had become accustomed to arising each day with a heavy head, dizzy and a bad taste in my mouth. My bowels were frequently clogged and constipated. I feel greatly relieved since taking your purely vegetable laxative." **CARTER'S LITTLE LIVER PILLS** All druggists—25c and 75c red pkg.

CHAPTER XXIV.—Continued.

"I cannot see anything very clearly," said Jack, miserably. "I only know my wife has gone. Circumstantial evidence seems to be against her, but nevertheless I will do my utmost to find her. I will take her word against the world."

The magistrate laughed softly, but there was no mirth in the sound. "Have a drink, my dear young friend," he said, "and forget her."

"No, thank you," said Jack. "I do not drink, and I am pretty sure I will never forget her."

There was something in the young man's voice and in his face that made Col. Blackwood wonder if he had pursued the right course. Perhaps he should tell of her coming to him to find out about the marriage. Perhaps he should tell . . . No! the hell-cat!—she had been impertinent to him, and she had threatened him.

When Jack had gone the magistrate sat a long time, wondering. Then he went to the cupboard and poured himself a drink; another drink, Ah! that was better. Now he knew he was right; another drink, and he was sure that he had done not only a wise but a noble thing in leaving the marriage unrecorded. After the third drink, he sat in a melow haze, musing pleasantly on the time that young Jack Doran would come to him with tears standing in his eyes and thank him for what he had done. "You saved me, and though I should live a thousand years I shall never be able to thank you adequately, Sir." And he would reply—"Have done, my boy,—have done; one brave man must ever help another!"

So the night wore pleasantly on.

CHAPTER XXV.

Not so pleasantly did the night pass with Jack Doran, who sat in the station waiting for No. 8 and listening to the wires telling their never-ending story—a dull, gray station, dusty even when the snow had covered all the dust. A red stove in the middle of the floor, egg-shaped, fluted, and either fireless or red hot according to the mood of the agent; torn posters showing palatial white steamers ploughing green seas and carrying pleasure-seeking Canadians to tropical lands, all for trifling sums "and return;" a bill of sale, where in-

ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Byemore, Alberta.—"The Change of Life was the trouble with me and I was run-down, thin, and weak and could not sleep, had a poor appetite and could not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a well woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends." Mrs. Wm. Goodkey, Byemore, Alberta.

W. N. U. 1736

structions had been given to the auctioneer to spare nothing, ill-health the cause of the owner's desire to sell; a stray notice re a bull pup answering to the name of "Buster," with a reward; a dance and raffle at Bannerman by St. Faith's Ladies' Aid, program and refreshments, and cordial invitation to all; "Save the Forest" poster—"The forest is ours, let us keep it always;" John Fernwald's announcement of his ability to mend shoes, Old Country methods and moderate prices—try me once.

Jack came back to his own bitter thoughts, to which the telegraph wires made a weird accompaniment, ghostly and grim. He could see the instrument from where he sat, muttering, tapping, clicking with its mysterious finger, silent for a few moments, then convulsed and shaken with the desire to be understood. He thought of all the suppressed emotions, the heart-break, anxiety and fears the wires carried in dead silence along the miles, and how they break into strange tappings here, chokingly alive and articulate.

Life was like that, he mused, we all carry our load of emotions carefully hidden, but we cannot all throw it off at intervals in dots and dashes like the wires.

Reaching the city, Jack went to the Macdonald Hotel, where he met his partner, Keith, whom he had not seen since the night of the recruiting meeting at Peace River. They discussed their plans for the future.

"I am going to have our specimens assayed here at the University, and I will go at once to Victoria to file our claims," said Keith.

Jack told him briefly of his domestic trouble. "I believe she is here in the city," he said in conclusion, "and I want to find her. I will not believe a word unless I hear it from her."

Keith whistled softly. "This is bad work, boy," he said, "and I am sure sorry. Women are the finest in the world or the worst—if they're not one they are the other. When you begin to break off the coupons from your gold mines stock you'll have a flock of them pursuing you, anyway."

Jack was looking out at the wide view of the winter landscape, with the magnificent river, covered with snow, winding away into the blue distance. "I don't want a flock," he said, "but I do want Helmi. If you knew her, Keith, you would know she couldn't be crooked. She has eyes that are like a little girl's, full of wonder and innocence."

"I don't believe there are any innocent girls these days," Keith replied, lighting his pipe for the twentieth time. He could never keep his pipe going, and when he sat for half an hour in one place he had burnt matches strewn around him like confetti around a bride. Keith was a low-set man of very dark complexion, tanned now to a rich mahogany.

"My own opinion is that you are well out of it, Jack," he continued; "but I'll admit I'm no judge of women. They can all fool me."

"Sometimes I think of enlisting," said Jack. "When I listened to that boy leaning on his crutch I wanted to go. The other old soak rather spoiled it, though."

"Gosh! I liked him," said Keith, grinning. "He told us some of the richest stories I ever heard."

"I couldn't stand him and his stories," Jack said with warmth, "he's the sort that make war, he loves it, you can see that—but you'll notice he will never do any of the fighting. It looks as if the thing had to be finished up now that we are in it."

Keith was watching Jack closely even though he was so busy keeping his pipe going. "I'll certainly look after your interests, Jack, if you want to go. I'll file for you on everything I get while you're gone, and I'm going to get right after the potassium deposits and the oil as soon as I get the gold clinched."

"I knew you would," said Jack gratefully. "I am not thinking about that."

"And I'll do my best to locate the Helmi girl and see that she has plenty."

Jack remembered Helmi's outbreak of rage when Keith's name was mentioned, and hastened to say, "I hope I'll find her before I go."

So, gradually, the thought of enlisting took shape in Jack's mind. It was with him when he stepped into the white bath-tub and enjoyed the luxury it afforded, with its shining appointments, snowy towels, foaming soap. But he couldn't forget what Private Crowe had told about the

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

13EW

dirt, the mud, the lice, the scratchy underwear. He was glad to think of the wealth coming to him from the gold mine, for he craved all the luxuries of life, and he wanted to be able to give them to other people. He loved white sheets, smooth and satiny, and beautiful rugs with deep rich colorings, music, pictures; but especially did he want these things for Helmi who had such a love for beauty.

No matter where Jack's thoughts began they would soon come back to Helmi. He wondered if she had got the two hundred dollars all right. At first he had thought that he would send for it when they were outfitting at Peace River, but Keith sold another share, and then they were all right. He had even written out an order for a friend of Keith's who offered to advance the money and get it when he went to Eagle Mines. What had he done with that order? Yes, he remembered—Keith got it back from his friend and destroyed it.

The first day Jack was in the city he made a thorough search of all the Chinese places, but without result. When he came to Sam's he was met by the wily proprietor, who had learned in a hard school that it is foolish to give information. Sam could lay down all his knowledge of English in a fraction of a second. "I not know," all at once became his entire English vocabulary.

(To Be Continued.)

NEGLECTED ANAEMIA

Often Leads To the Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McEachern, Port Hood, N.S., says:—"I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Plains Buffalo In North

The experiment of transferring buffalo from the national park at Wainwright, Alberta, to Wood Buffalo Park near Fort Smith, Northwest Territories, has proved entirely successful and the 5,500 plains buffalo which have already been transported have definitely shown their adaptability to northern conditions.

British scientist says that the brain is the only part of the body which doesn't wear out. The test of this theory, is, of course, first to find the brain.

Walk in Peace

Remove the hard skin from your corns, apply Minard's freely and get comforting relief.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

DENTAL HEALTH PILLARS

"Sugar and spice and everything nice" may be what little girls are made of, but certainly such a diet would never build strong, healthy little girls and boys.

With the child properly started on the road to health, through the mother's careful dietary habits, there must be no slacking in this regard, if it is to continue safely along the way.

Proper diet from the nursing period up through adolescence has much to do with teeth and health. It is now that nutrition plays the chief role in the formation of healthy tooth tissues or in their early degeneration and decay. But hand in hand with this must go the maintenance of cleanliness through training the child in the best and most thorough mouth hygiene.

The notion that the deciduous teeth being replaced by successors can therefore be allowed to go without the care necessary to keep them sound and comfortable is most mischievous. Too early loss of these little teeth from any cause, leads to disturbances of the permanent dentition with consequent general disorders.

It would be better for the young child not to know the taste of sweets too soon, thereby avoiding their craving at this early age when they may be harmful both to the tooth and the body health. Plain wholesome foods should be the rule including plenty of milk which, because it is both rich in nutrient qualities and easily assimilated, is the perfect food for the young child.

Parents should be reminded too, that the child should be brought to the dentist at about three years of age and thereafter at stated intervals. Preferably the first visit should be made before there are any cavities in order to establish the confidence of the young child in these services. Much of the dread of dental treatment, with its consequent neglect of mouth conditions among adults has arisen through recollections of a painful first visit during the tender years.

It may be further noted that the susceptibility to tooth decay is greatest in youth, most cavities appearing before the twenty-fifth year; and that the period of adolescence and between the twelfth and sixteenth years, marks the high-water mark of dental decay;—due to the rapid physical changes demanding an increased calcium supply present in the diet. Diet, mouth hygiene and systematic dental examinations are the three pillars of dental health.

Ocean Ships For the Great Lakes

Tramp Steamers From Europe Pushing Their Way Into the Great Lakes

One indication that if the St. Lawrence canals were deepened, sea-going freighters would come up to the ports on the great lakes is that this is already done by tramp steamers which are able to go through the shallow St. Lawrence canals. A German freighter from Hamburg is now lying at the docks of Detroit taking on a cargo of motor-cars which it will unload at Barcelona, Spain. For years past an occasional small tramp steamer has pushed its way into the great lakes in search of a grain cargo. If these things happen with 14-foot canals it is a safe prediction that a 27-foot channel would bring whole fleets of tramps to the lake ports. The tramp steamer will go where there is traffic if it is possible to get there.—Manitoba Free Press.

Attacked By Asthma. The first fearful sensation is of suffocation which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Over Fifty Minerals Being Produced

A notable feature of the program of the Dominion as a mining country is the diversity of lines along which Canadian mining has advanced. Some fifty different minerals, metallic and non-metallic, are listed in the production figures for 1926, and this number includes a variety such as nickel, cobalt, asbestos, gold, lead, silver, copper, and zinc, in which Canada either leads world production or ranks among the greater producing nations.

Most of the bats of Canada eat only insects, but there are a few fruit-eating bats in the extreme south of the United States and many in Mexico and Central America.

Add to the joy of the open road—this pleasure-giving refreshment. A sugar-coated gum that affords double value. Peppermint flavor in the sugar coating and peppermint flavored gum inside.

Little Helps For This Week

"The will of the Lord be done."—Acts xxii. 14.

Light! more light to see What is the true and perfect will of God. That we may help to do it; not as tools, That know not what they fashion, but as hands, Whose heart is in their work; and whatsoever It be,—this, above all, more faith to cry In darkness or in light, "Thy will be done."

Love is higher than duty, and the reason is that love in reality contains duty in itself. Love is duty and something more. "Love is a beautiful plant with a beautiful flower, of which duty is the stalk." All acceptable obedience flows from love; all true love produces cheerful service. We do not really love God if we do not seek to obey Him.—Rose Porter.

Always Ready and Reliable.

Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Cardinal Newman On Style

To Produce Good Literature Put Your Thoughts Into the Simplest and Clearest Words Possible

"I have no style," wrote Cardinal Newman. "All my life I have tried to think out clearly what I know, what I see, what I feel, and to put it into the simplest and clearest words. That is all my style. To produce literature you must first of all know what you are writing about; write in as simple words as you can; cut out the purple patches; be sincere without being dull; grip the subject before you; feel it, and translate it into the simple English our fathers have handed down to us."

For Rheumatism use Minard's Liniment.

No Chrome Being Produced

There has been no production of chrome in the Dominion in recent years although Canada is known to possess reserves of chrome ore, and a considerable tonnage was mined and shipped during the war period.

A Swedish count is coming to Canada to learn farming by working as an agricultural laborer, and the question is, what farmer is going to take the count?

BURNSIDE NOTES

The regular monthly meeting of the Burnside U.F.A. will be held Monday evening, June 11th in Jutland school instead of Lone Pine Hall as the hall is being plastered. A full attendance is requested as plans are to be made for the annual picnic on June 30th.

Mr. Dave Jenkins is spending the week in Edmonton as delegate from Burnside U.F.A. to the Farm Young Peoples' Week at the University of Alberta.

Mr. Ralph Long, who spent the spring months with Mr. Noah Eckel, is leaving this week to take a job on the government grader near Carstairs.

Mr. and Mrs. N. Eckel and son Robert spent Sunday near Three Hills.

The Lone Pine W. I. will meet Thursday afternoon, June 14th, at the home of Mrs. E. R. Dawson. Mrs. Chas. Mordon and Mrs. Bert Pross will give a report of the recent convention at Calgary.

Mr. and Mrs. Sam Elliott had the misfortune to lose their 3-weeks old baby, Jessie May, last Monday evening from double pneumonia. The funeral which was held from the United Church, Didsbury, last Wednesday was attended by many of their friends and neighbors in the district.

Keep the date June 30th in mind. It is the annual Burnside U. F. A. picnic.

Mr. and Mrs. Lloyd Heber and family spent the week end with Mrs. Heber's parents at Rowley, Alta.

a Successful Six

A Better Car than Ever at its Price

THE New Series Pontiac Six was designed and built in the belief that everybody admires style in a motor car.

So, in Pontiac Six, everybody can enjoy it!

Beautifully-proportioned bodies that tell their Fisher craftsmanship at a glance . . . Long, low lines and deep, massive radiator design . . . Rich harmonies of color in exterior Duco and interior trim . . . Delightful evidence of luxury in upholstery and appointments . . . PLUS the smoothness of Pontiac's powerful "Six" engine . . . the safety of Four Wheel Brakes and the comfort of Lovejoy Hydraulic Shock Absorbers.

No wonder the New Series Pontiac Six literally leads its field in style and refinement. Prove it all for yourself by a demonstration.
